

Ground Level Solutions, Inc. (GLS) is proud of our presence in your community and like you we are troubled by the economic, social, and health distress that has been caused by the onslaught of the coronavirus pandemic. The GLS team closely watches the evolving coverage of the after-effects of COVID-19 and its variants. We gather information from credible sources, such as the Center for Disease Control (CDC), the Occupational Safety and Health Administration (OSHA), and the Ohio Department of Health, to adjust our safety practices as is proper to keep our employees and customers as safe as possible.

To help our team manage the dynamic and expanding nature of the pandemic, the GLS Board of Directors adopted and implemented a COVID-19 Emergency Action Plan which provides guidance to our Company and subcontractors on reasonable and safe behavior in our offices and in customer homes. Our Company's goal is to deliver an effective service with your safety as our number one priority.

If you have any questions about our services or how we conduct our work in your home, please let us know. You may reach us by telephone or email. Our Company's contact information may be found at the **CONTACT** tab of our web page.

We look forward to hearing from you and helping you with your energy conservation and energy efficiency needs.

John Johnson, Jr.  
Executive Director
